OVERVIEW Specialist in Anesthesiology and Intensive Care (Sp.An-TI)

Duration: 4 YEARS Format: Full Time

1. • The Anesthesiology Residency Training Program at Universitas Pelita Harapan (UPH) is dedicated to preparing residents for excellence in anesthesiology, perioperative care, and critical care medicine. The program offers a comprehensive, resident-centered training experience designed to support both clinical mastery and professional growth.
2. • Residents will undergo a structured four-year curriculum with clinical rotations across the Siloam Hospitals network, including major centers in Jakarta and beyond. With **more than 50,000 anesthesia cases annually**, the program provides extensive exposure to diverse surgical specialties, advanced monitoring techniques, and state-of-the-art perioperative care.
3. • A key strength of the program lies in its balanced emphasis on technical proficiency and leadership development. Residents will be trained not only to deliver high-quality anesthesia care but also to lead multidisciplinary teams within the framework of the anesthesia care team model. The program provides a collaborative, supportive learning environment that encourages initiative, critical thinking, and continuous improvement.
4. • Residents will rotate through **more than seven specialty divisions** and benefit from strong academic partnerships, as well as a nationwide network of experienced clinicians and educators.
5. • At UPH, we aim to go beyond traditional training. We strive to empower our residents with skills, confidence, and perspective needed to become innovators and leaders in the evolving landscape of healthcare.

CAREER PATH

1. Specialist in Anesthesiology and Intensive Care*

Most graduates work as full-time anesthesiologists in public or private hospitals, practicing within hospital-based settings.

2. Fellowship and Subspecialty Training*

Graduates often pursue advanced training in fields such as:

- Critical Care Medicine
- Pain Management (Interventional Pain Management)
- Cardiac Anesthesia
- Neuroanesthesia
- Pediatric Anesthesia
- Obstetric Anesthesia
- Regional Anesthesia

UPH supports graduates in applying to national and international fellowship programs, including opportunities in Australia, Europe, and Southeast Asia.

3. Academic and Teaching Roles*

Some alumni pursue careers as faculty members or lecturers in medical schools, including UPH.

They may be involved in:

- Simulation-based training
- Research supervision
- Curriculum development

4. Leadership and Administrative Roles*

With training in the anesthesia care team model, graduates are well prepared for leadership roles such as:

- Head of Anesthesia Department
- Hospital medical committee positions
- Quality and patient safety leadership

5. Research and Innovation*

Graduates may pursue:

- Clinical research
- Quality improvement projects
- Scientific publications in anesthesiology, critical care, and pain medicine

6. International Opportunities*

Some graduates are eligible for further training or clinical practice abroad, especially in countries that recognize Indonesian medical credentials through verification and credentialing processes.
